

Rajshahi University of Engineering & Technology
Department of Computer Science & Engineering
Digital Skills Training for Students
Final Assessment

Track Name: PHP (Laravel)
Batch No.: RUETCSE0104
Student Name:

Marks: 25
Total Duration: 1:50 Hours
Obtained Marks: ____

Instructions: You are given a base code (index.blade.php). You need to modify the given Blade template based on the following requirements:

Question 1:

Marks
5

Modify the blog post list to dynamically fetch posts from a Laravel controller and display them inside the Bootstrap list group. If there are no blog posts, display *****No blog posts available.*****

Question 2:

10

1. Modify the "Create New Post" button so that it links to a form where users can submit a new blog post.
2. Implement the form with a `POST` method and submit the data to the Laravel route `post.store`.
3. Store the submitted post in a session variable named `posts` and redirect back to the blog post list after submission.

Question 3:

10

1. Modify the blog post titles to be clickable, linking to a new route `post.show` with the `post_id`.
2. Create a new Blade file `show.blade.php` that displays the full post details.
3. If the post does not exist, display **"Post not found."**

Deliverables

1. All updated codes in a zip file.

THE END
